

SIA-INDIA PRESENTS

TECH WOMEN IN SPACE

Paving the way for Gen Next>>

World Space Week is a UN-declared celebration of space held annually, between 4th and 10th October. It is the largest space event, with over 8,000 events reported in 2019 and held in 96 countries. These events are organized by thousands of organizations, including space agencies, aerospace companies, astronomy clubs and museums.

This year the theme is **'Women in Space'**.

SIA-India, a young and vibrant association created to represent the 'Space' ecosystem in India, is supporting this event. We have a panel discussion by eminent women speakers who have made a mark for themselves in the space tech/business.

This panel talks about the immense opportunities created by the opening up of the space economy by the Govt. With the Indian industry gearing up to take its place as a world leader in 'Space', the wide choice of career options make this a very exciting place to be in.
