

# **Redefining Mobile Connectivity for the 21<sup>st</sup> Century**

# Introducing the World's First Global Hybrid Mobile Network

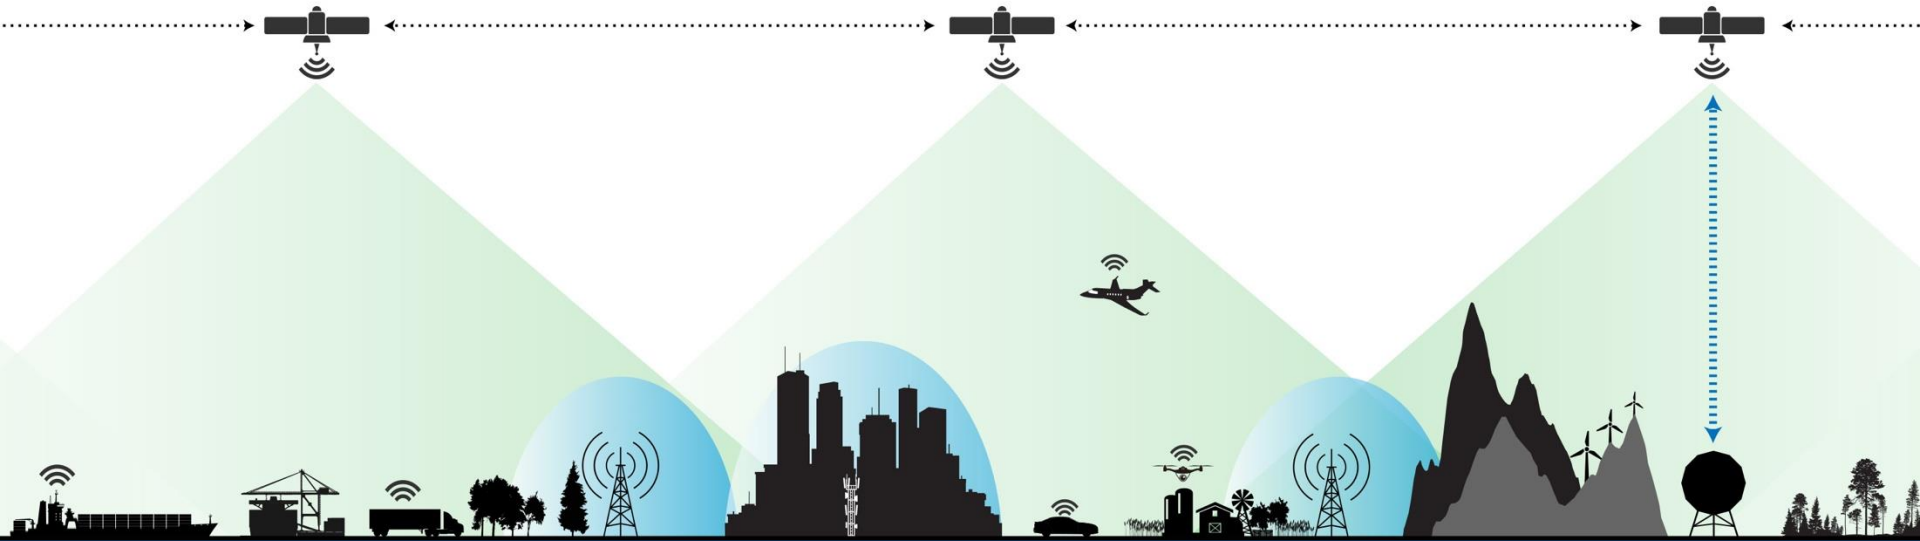

Using 5G to deliver mobile connectivity for consumer, enterprise, government and IoT users worldwide

**ONE GLOBAL NETWORK**  
Without boundaries. Without borders. Without compare.

# Omnispace Delivers Ubiquitous Mobile Connectivity

## 5G hybrid architecture combines global NGSO coverage and mobile network roaming

### Mobile Network Operations

When the device is in the MNO's terrestrial coverage area it will connect to MNO's Network

### Satellite Network Operations

If the device is outside MNO coverage or roaming outside of the "home network" it will connect through the Satellite Network

# Enhanced Global Mobile Connectivity Solutions

## Services

## Customers

Global Voice & Data Communications for Consumer, Enterprise and Government Users

# Empowering people and assets globally.
